

Engineering problems. Clear next steps.

One defined engineering or manufacturing problem. A focused technical review.
Practical recommendations. A clear way forward.

A\$195

Fixed-price remote assessment, one defined problem

GST applies where applicable. The exact amount payable is confirmed in writing before you pay.

01

Problem understanding

One clearly defined engineering or manufacturing problem.

02

Technical discussion

Up to 30 minutes of remote discussion.

03

Preliminary review

Drawings, photographs or process information you supply.

04

Improvement options

Up to three, where the evidence permits.

05

Written recommendation

A professional one-page PDF.

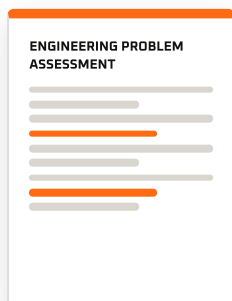

WHO IT IS FOR

- Manufacturers, fabricators and equipment builders
- Product businesses with a mechanical design question
- Production and operations teams with one recurring problem
- Teams that want an engineering view before a larger engagement

TYPICAL PROBLEMS

- Assembly alignment problems
- Jig and fixture requirements
- Manufacturing process difficulties
- Mechanical product modifications
- CAD and drawing-related problems
- Design for manufacture challenges
- Production documentation improvements
- Repetitive manual assembly tasks

DELIVERABLE PREVIEW

A one-page PDF: problem statement, information reviewed, preliminary findings, up to three improvement options, the recommended next action, assumptions and limitations, and possible follow-on work.

HOW THE PROCESS WORKS

- 1 Submit**
Describe one problem using the enquiry form. No payment is taken.
- 2 Confirm**
KEVOS® checks suitability and confirms the scope in writing.
- 3 Pay**
Pay A\$195 using the payment instructions provided.
- 4 Book**
After payment is verified, book a 30-minute remote meeting.
- 5 Receive**
Receive the one-page PDF recommendation.

Payment is requested only after the scope is confirmed. The meeting is booked only after payment is verified.

SCOPE EXCLUSIONS

- Physical inspection
- Site visits
- Detailed CAD modelling
- Manufacturing drawings
- Prototypes
- Testing
- Formal certification
- Regulated design sign-off
- Guaranteed root-cause identification
- Guaranteed savings
- Detailed implementation work

Further engineering services are scoped and quoted separately.
